

Kirill Fisyukovich - Resume

Summary

Python Backend Developer based in Brest, Belarus. I build backend systems, admin tools, APIs, data pipelines, service integrations, and practical AI features for real products.

Top skills: Python, FastAPI, Django, PostgreSQL, ClickHouse, Celery, RabbitMQ, Redis, SQLAlchemy, Docker, CI/CD, networking, OpenCV, PyTorch.

Experience

Viory (<https://www.viory.video/>) - Python Developer

August 2025 - Present · UAE

News agency CRM. Built backend functionality for editorial workflows, video uploading, processing, and publishing resources to the main platform.

Stack. Django, ffmpeg, PostgreSQL.

ItFox (<https://itfox-web.ru/>) - Python Developer

January 2024 - August 2025 · Sochi, Russia

Restaurant loyalty application. Built points, loyalty levels, event push notifications, admin dashboards, charts, listings, statistics, and role-based tools.

Booking platform. Built services for processing reservation requests from loyalty apps, phone calls, and other sources; added quality reports and blacklists.

Chat microservice. Refactored and developed FastAPI chat services for loyalty and booking products, including restaurant and call-center chats.

Dish recognition system. Introduced computer vision into buffet hardware, trained custom models, automated training from external JSON, and built quality reports.

Blockchain wallet. Developed P2P trading features, integrated Stellar payments, refactored legacy code, supported Kubernetes, wrote CI/CD pipelines, and reviewed code.

Stack. Django, FastAPI, PostgreSQL, Redis, Celery, RabbitMQ, SQLAlchemy, PyTorch, OpenCV, Docker.

LianMedia LLC (<https://lianmedia.ru/>) - Big Data Analyst

October 2023 - January 2024 · Perm, Russia

Analytics storage. Designed ClickHouse databases for analysis and long-term data storage, import flows, export procedures, and reporting formats.

Network analysis software. Built Linux and Windows tools for network analysis and network map generation, including Debian packages and command-line automation.

Stack. ClickHouse, Pandas, SQLAlchemy, MySQL, nmap, bash.

LianMedia LLC (<https://lianmedia.ru/>) - Database Administrator

June 2023 - January 2024 · Perm, Russia

ClickHouse operations. Created and maintained tables, supported data imports and exports, and prepared database selections for competitive intelligence work.

The Entrust Group (<https://www.theentrustgroup.com/>) - Python Developer

November 2021 - December 2023 · Perm, Russia

Review platform. Built restaurant and hotel review functionality, flexible fields, rating scales, admin customization, and API endpoints.

Telegram bots. Built reporting bots, internal task bots, and an offline business-camp simulation bot.

Parsing tools. Built bookmaker parsers with anti-bot handling and Excel report generation.

Hardware-adjacent apps. Built quest-room control software, residential vending-machine web software, and face-control software for an IT conference.

gRPC and libraries. Designed proto files, client/server components, and internal reusable libraries.

Stack. Django, DRF, PostgreSQL, FastAPI, Flask, OpenCV, Pyrogram, Aiogram, Selenium, BeautifulSoup, Docker.

Morion PJSC (<https://www.morion.ru/>) - Python Developer

April 2021 - January 2022 · Russia

Switch management platform. Built a web control panel for network switches, communication gateway paths, channel management, and monitoring integrations.

Task processing. Built Celery systems for processing 3D models, videos, photos, and text with ffmpeg and OpenCV.

Testing. Wrote PyTest and unittest coverage and integrated tests into GitLab CI/CD.

Stack. Flask, SQLAlchemy, Zabbix, Celery, ffmpeg, OpenCV.

Education

Polessky State University

Bachelor's degree, Information Technologies of Financial and Credit System · September 2019 - August 2023

Certifications

- Introduction to IoT
- Advanced Python
- Responsive Web Design
- Cisco Networking Academy Entrepreneurship English Course
- Cybersecurity Essentials
